SKILLS

Programming Languages: Dart, Java, C, HTML, CSS
Frameworks & Platforms: Flutter, FlutterFlow
Backend & APIs: REST API Integration, Firebase (Authentication, Realtime Database), Supabase
Development Tools: GitHub, Visual Studio Code, CodeMagic, Jira, Linear, FlutterFlow
Core Competencies: Mobile App Development, Frontend Development, API Integration, State Management, Debugging & Troubleshooting, System Design, Problem Solving
Practices: Low-Code Development (FlutterFlow), Agile Collaboration, Code Optimization
AI-Assisted Development:
Claude (Claude Code – Code Generation, Debugging, Refactoring, System Design Support)

WORK EXPERIENCE

FlutterFlow App Lead Developer | *Freelance — PetPals App* September 2025 – Present

- Led end-to-end project architecture, structure, and development flow for the application.
- Served as the primary frontend developer, owning the full UI implementation.

FlutterFlow App Developer | *Sandlot Technology Ventures Inc.* August 2025 – April 2026

- Mentored junior developers on FlutterFlow best practices for building cross-platform iOS and Android applications.
- Developed and maintained multiple client-facing mobile and web applications across various client projects.

FlutterFlow App Developer | *CoreCoach / ThatAgency* August 2024 – May 2025

- Collaborated in building a cross-platform mobile app connecting Personal Trainers with Clients for Nutrition and Training management.
- Developed multiple reusable components to reduce dependency on custom widgets and improve maintainability.
- Owned sophisticated user flows for both Client and Coach app experiences.
- Built Custom Functions, Actions, and Widgets using Dart.
- Used Jira and Figma to manage, track, and update tasks.

FlutterFlow App Developer | *AHG LAB / Sandlot Technology Ventures Inc.* September 2022 – August 2024

- Contributed to multiple Startup and Enterprise projects spanning Admin dashboards, iOS/Android Mobile Apps, and Web Apps.
- Developed Doon — a car rental platform allowing users to book or list their own vehicles, with validations, referral, and discount flows.
- Developed the EHub app for St. Luke's Medical Center.
- Built PHLPPost Zapp, implementing the new 7-digit ZIP code system for the Philippines.
- Studied and applied GitHub integration workflows for FlutterFlow.
- Used Figma and Jira to manage, track, and update tasks.

Software Development Intern | *AHG LAB* April 2022 – July 2022

- Learned and applied FlutterFlow to develop mobile applications for both iOS and Android.
- Developed an internal app to record employee Time In and Time Out.
- Developed a company news feed app for internal happenings and announcements.
- Contributed to the HR Job Repository web app for the company.
- Familiarized with Firebase, Figma, Xano, and other tools.

CERTIFICATES

Emerging Technologies: Creating a Mobile App via No-Code Platform with Google Gemini February 2, 2025

Event Speaker — Our Lady of Fatima University, CCS

Low-Code Development with FlutterFlow and Gemini January 9, 2025

Event Speaker — Google Developer Student Clubs PLM

EDUCATION

Polytechnic University of the Philippines Graduated: 2022

Bachelor of Science in Information Technology

PROJECTS

PetPals App - Led the entire app development as project lead. - Implemented screens and designs based on UI/UX specifications. - Implemented Custom Actions and Widgets for all app modules. - Integrated Voice AI Chat via ElevenLabs.	2025
LBC Express App - Led the entire frontend mobile application development and managed the frontend team and interns. - Developed core modules including Login, all Bookings, and User Profile screens. - Assisted co-developers in troubleshooting and resolving blockers. - Led deployment of the app to Google Play Store and Apple App Store. - Managed LBC's Firebase infrastructure.	2025
CoreCoach App - Built iOS and Android app handling Workouts and Nutrition for Clients and Coaches. - Built Client and Coach screens including Training menus, Exercise screens, and Client Management. - Debugged and revised features based on client feedback.	2024
PHLPost Zapp - Built Web, Mobile, and Tablet app implementing the new 7-digit ZIP code for the Philippines. - Built current user location tracking and Map integration for location visualization.	2024
Hijo Hydroponics App - Built a Web and Tablet App for internal Hydroponics plant management. - Built plant tracking, individual plant management, and user detail screens. - Added new feature screens to extend the app's core functionality. - Implemented REST API integrations.	2024
St. Lukes Medical Center EHub App - Built Mobile and Web App managing hospital client billing, reservations, and room bookings. - Built User Profile and Edit Profile screens; resolved issues from client and user feedback.	2024
Doon PH Car Rental App - Built a Mobile app for car bookings, vehicle hosting, checklist flows, and referral/discount implementation. - Extended the Admin Dashboard (Web) with Referral and Discounts features. - Maintained and debugged based on client and customer feedback; implemented REST APIs.	2022
Shae Fitness App - Developed Screens and Components in a shared Library project, then integrated the library into the main Shae app. - Implemented REST API integrations.	2025
mySTAY App - Developed all screens and converted reusable UI patterns into optimized components for a leaner widget tree. - Implemented all app logic, REST API integrations, and Supabase Authentication.	2025
Navigap AI Chat App - Reviewed and understood the existing project codebase and architecture. - Mentored a developer through a full tech stack migration from Webflow to FlutterFlow.	2025
Athletica Studios App - Built a Mobile App for studio bookings, workout details, and workout showcase screens. - Fixed features for studio and client booking management.	2024
WeRemote Virtual Office Developed screens, features, and API integrations including Parcel management screens.	2022
AHG Job Repository Developed screens, features, and API integrations; maintained and debugged existing features.	2022
AHG Application Redevelopment & Time In/Out - Developed and integrated Home Screen with Company News feed and Time In/Time Out functionality. - Built foundational Time In and Time Out system for company employees.	2022
